Reply to Office Action dated January 11, 2006

PATENT  
450100-03328

### IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application. An identifier indicating the status of each claim is provided.

#### Listing of Claims

1. (Currently Amended) A digital broadcast signal processing apparatus comprising:  
  
a memory section for storing GPS position information received from a movable body that is an object; and  
  
a multiplex processing section for multiplexing the GPS position information received from the movable body and GPS position information received from an imaging apparatus on a digital broadcast signal of a corresponding program.

2. (Currently Amended) A digital broadcast signal processing apparatus comprising:  
  
a mapping processing section for mapping position information of a movable body that is an object and position information of an imaging apparatus on a map on a basis of GPS position information received from the movable body and GPS position information received from the imaging apparatus; and  
  
a multiplex processing section for multiplexing mapping information generated by said mapping processing section on a digital broadcast signal.

3-6. (Canceled)

**BEST AVAILABLE COPY**

U.S. Appl. No. 09/903,014  
Reply to Office Action dated January 11, 2006

PATENT  
450100-03328

7. (Original) The digital broadcast signal processing apparatus according to claim 1, wherein said multiplex processing section multiplexes profile information concerning the movable body on the digital broadcast signal.

8. (Original) The digital broadcast signal processing apparatus according to claim 7, wherein said profile information includes uniform resource locator (URL) information or mail address information, both being for access to information concerning the movable body.

9. (Currently Amended) A digital broadcast signal processing apparatus comprising:

a mapping processing section for separating GPS position information of a movable body that is an object and GPS position information of an imaging apparatus from a digital broadcast signal that was received or reproduced to map position information of the movable body and the imaging apparatus on a map on a basis of ~~the~~ GPS position information of the movable body and GPS position information of the imaging apparatus; and

a multiplex processing section for multiplexing mapping information generated in said mapping processing section on a digital broadcast signal of a corresponding program.

10-11. (Canceled)

U.S. Appl. No. 09/903,014  
Reply to Office Action dated January 11, 2006

PATENT  
450100-03328

12. (Currently Amended) A digital broadcast signal processing apparatus comprising:  
a memory section for storing profile information concerning a movable body that is an object; and  
a multiplex processing section for multiplexing the profile information ~~concerning the movable body that is the object of a digital broadcast signal and position information of an~~  
imaging apparatus that was received or reproduced on the a digital broadcast signal.

13. (Currently Amended) The digital broadcast signal processing apparatus according to claim 12, wherein ~~any of the~~ position information of the movable body that is the object, mapping information generated by mapping of the position information of the movable body that is the object and/or position information of an imaging apparatus on a map, imaging area information by the imaging apparatus and object information by the imaging apparatus is multiplexed on the digital broadcast signal.

14. (Original) The digital broadcast signal processing apparatus according to claim 12, wherein said profile information includes uniform resource locator (URL) information or mail address information for access to information concerning the movable body.

15-22. (Canceled)

U.S. Appl. No. 09/903,014  
Reply to Office Action dated January 11, 2006

PATENT  
450100-03328

23. (Currently Amended) A digital broadcast signal processing method comprising the steps of:  
reading out GPS position information received from a movable body that is an object;  
reading out GPS position information received from an imaging apparatus; and  
multiplexing the GPS position information received from the movable body and  
GPS position information received from the imaging apparatus on a digital broadcast signal of a  
corresponding program.

24. (Currently Amended) A digital broadcast signal processing method comprising the steps of:  
mapping position information of a movable body that is an object and position  
information of an imaging apparatus on a map on a basis of GPS position information received  
from the movable body and GPS position information received from the imaging apparatus; and  
multiplexing mapping information generated in said mapping step on a digital broadcast signal.

25-27. (Canceled)

28. (Currently Amended) A digital broadcast signal processing method comprising the steps of:  
reading out GPS position information received from a movable body that is an object;

U.S. Appl. No. 09/903,014  
Reply to Office Action dated January 11, 2006

PATENT  
450100-03328

reading out imaging area information by an imaging apparatus;  
reading out GPS position information received from an imaging apparatus; and  
multiplexing the GPS position information received from the movable body, GPS  
position information received from the imaging apparatus and the imaging area information on a  
digital broadcast signal of a corresponding program.

29. (Original) The digital broadcast signal processing method according to  
claim 24, said method further comprising a step of:

multiplexing profile information concerning the movable body on the digital  
broadcast signal.

30. (Original) The digital broadcast signal processing method according to  
claim 29, wherein the profile information includes uniform resource locator (URL) information  
or mail address information, both being for access to information concerning the movable body.

31. (Currently Amended) A digital broadcast signal processing method  
comprising the steps of:

separating GPS position information of a movable body that is an object and GPS  
position information of an imaging apparatus from a digital broadcast signal that was received or  
reproduced to map position information of the movable body and the imaging apparatus on a  
map on a basis of the GPS position information of the movable body and GPS position  
information of the imaging apparatus; and

U.S. Appl. No. 09/903,014  
Reply to Office Action dated January 11, 2006

PATENT  
450100-03328

multiplexing mapping information generated in said step on a digital broadcast  
signal of a corresponding program.

32-33. (Canceled)

34. (Currently Amended) A digital broadcast signal processing method  
comprising the steps of:

reading out profile information concerning a movable body that is an object;

reading out GPS position information of an imaging apparatus; and

multiplexing the profile information concerning the movable body ~~that is the~~  
~~object of a digital broadcast signal that was received or reproduced and~~ the GPS position  
information on the a digital broadcast signal.

35. (Currently Amended) The digital broadcast signal processing method  
according to claim 34, wherein ~~any of the~~ position information of the movable body that is the  
object, mapping information generated by mapping of the position information of the movable  
body that is the object and/or position information of an imaging apparatus on a map, imaging  
area information by the imaging apparatus and object information by the imaging apparatus is  
multiplexed on the digital broadcast signal.

36. (Original) The digital broadcast signal processing method according to  
claim 34, wherein said profile information includes uniform resource locator (URL) information  
or mail address information for access to information concerning the movable body.

U.S. Appl. No. 09/903,014  
Reply to Office Action dated January 11, 2006

PATENT  
450100-03328

37-44. (Canceled)

45. (Currently Amended) A digital broadcast signal processing method comprising the processes of:  
multiplexing GPS position information received from a movable body that is an object and GPS position information received from an imaging apparatus on a picture signal; and transmitting the picture signal after the multiplexing process as a digital broadcast signal.

46. (Currently Amended) A digital broadcast signal processing method comprising the processes of:  
multiplexing GPS position information of a movable body that is an object, GPS position information of an imaging apparatus and imaging area information by ~~an~~ the imaging apparatus on a picture signal; and transmitting the picture signal after the multiplexing process as a digital broadcast signal.

47. (Currently Amended) A digital broadcast signal processing method comprising the processes of:  
multiplexing mapping information generated by mapping position information of a movable body that is an object ~~and/or~~ and position information of ~~a~~ an imaging apparatus on a map on a picture signal; and

U.S. Apln. No. 09/903,014  
Reply to Office Action dated January 11, 2006

PATENT  
450100-03328

transmitting the picture signal after the multiplexing process as a digital broadcast  
signal.

48. (Canceled)

49. (Currently Amended) A digital broadcast signal processing method  
comprising the processes of:

multiplexing profile information concerning a movable body that is an object and  
GPS position information of an imaging apparatus on a picture signal; and

transmitting the picture signal after the multiplexing process as a digital broadcast  
signal.

**BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- ☐ BLACK BORDERS
- ☐ IMAGE CUT OFF AT TOP, BOTTOM OR SIDES
- ☐ FADED TEXT OR DRAWING
- ☐ BLURRED OR ILLEGIBLE TEXT OR DRAWING
- ☐ SKEWED/SLANTED IMAGES
- ☐ COLOR OR BLACK AND WHITE PHOTOGRAPHS
- ☐ GRAY SCALE DOCUMENTS
- ☒ LINES OR MARKS ON ORIGINAL DOCUMENT
- ☐ REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY
- ☐ OTHER: \_\_\_\_\_

**IMAGES ARE BEST AVAILABLE COPY.**

**As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.**
